# Take control of your MicrobioMe

PrecisionBiotics® can help you to take control of your own health by unlocking the power of the human microbiome. We put the ME in your MicrobioME.

## We are evolving

PrecisionBiotics® has a unique vision and history. For over 20 years, we have researched bacterial cultures and enzymes and their impact on the human microbiome.

As part of our journey, we are now introducing a new brand identity to reflect our dedication to developing precision food supplements based on advanced data science and the highest scientific standards.

## Zenflore

Zenflore is the world's first supplement harnessing the unique T714-Serenitas® bacterial culture. Combined with selected vitamins, Zenflore provides support for your mind and body through life's daily challenges.\*

### Proven science and beautiful biology

Proven supplements containing natural bacteria can help us live our best life. They can help us maintain our balance and improve our wellbeing. Combining the wonder of nature's own tools with the precision of modern science, we offer targeted solutions for people of all ages. And we are committed to providing proven products through state-of-the-art clinical studies.

### Modern lifestyle and aspirational health

Building on consumer insights and scientific research, we target some of the most pressing health problems related to modern lifestyles. Our precision supplements contain proven combinations of enzymes, probiotics, and vitamins, designed to optimize the human microbiome.

### A shared vision to improve the future of health

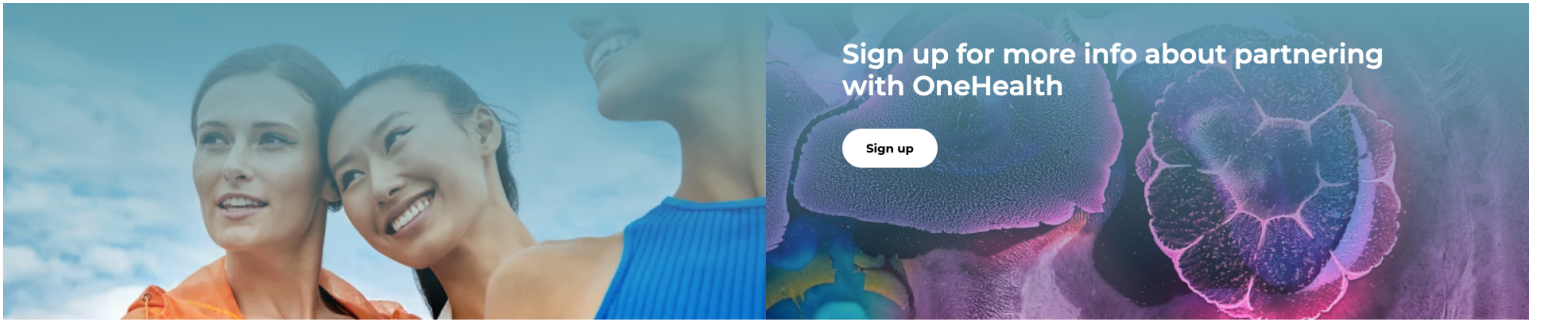

**PrecisionBiotics®** was founded by scientists who believe the human microbiome contains the answers to many modern health problems. From our very start we have been dedicated to matching unique bacteria strains to specific health conditions.

Today, we are part of Novozymes OneHealth and working with human health centres of excellence across the world. We have access to the world's largest collection of bacteria strains and thousands of enzymes, that help further our dedication to find sustainable solutions for future generations.

Our unique heritage and expertise allow us to look for one-in-a-trillion solutions and empower people to live healthier, happier lives.
